Richard Dowdy

Full Stack Web Engineer (Burlingame, CA)

richard.dowdy0@gmail.com | http://www.richarddowdy.io | https://github.com/richarddowdy | linkedin.com/in/richard-dowdy-webdev

---

Skills

Programming Languages: JavaScript, Python, SQL, HTML, CSS.

Frameworks/Libraries: React, Redux, Node, Express, Django, Flask, PostgreSQL, Selenium, Jest.

Experience

Software Engineer in Test (Remote) at Bbot, Inc (New York, NY)
- Developed internal devtools with React to aid all engineers in development and debug processes that increase overall engineering velocity.
- Spearheaded the development and launch of the load testing suite.
- Implement test automation to increase dependability of feature delivery.

Software Engineer at JumpOffCampus, Inc (San Francisco, CA)
- Created and implemented modular, reusable React components that other team members were able to incorporate elsewhere in the project.
- Converted existing React class components to be function components which allow for development with React hooks.
- Developed customized client facing web views using React and Bootstrap.
- Built models and controllers in Rails to create new features that enhanced user experience.
- Updated Rails controller actions as the code base was being overhauled from Rails 2 to Rails 5.

College Athlete at Barton College (Wilson, NC)
- Member of the Men's Basketball team.
- Developed strong work ethic and discipline.
- Honed strong leadership skills within a team environment.

Projects

Covid-Tracker - React application to track and visualize COVID-19 cases in the US.
- React with Redux for state management.
- Color coded heat map of the US to represent data gathered from external API.
- Uses d3.js library to visualize the progression of COVID-19 cases for each state over time.

Warbler - Fullstack Twitter clone.
- Flask backend combined with Jinja templates for frontend views.
- Flask routes follow RESTful architecture.
- Full CRUD routing allows users to manage their own accounts and messages.
- PostgreSQL Database.

Microblog - Fullstack Anonymous Blogging Application.
- React frontend with Express backend.
- Redux/Redux-Thunk for state management.
- PostgreSQL Database.

Education

Rithm School (San Francisco, CA)

Full Stack Web Engineer

Barton College (Wilson, NC)

BS in Fitness Management | Minor in Spanish
